

Aurum Equity LLC

Technology Consulting and Systems Support

UEI H2PBRHL3GT65 | NAICS 541511 541512 541519 | CAGE 18U14

Aurum Equity LLC provides technology consulting and systems support specializing in enterprise-scale application architecture, system integration, and IT modernization for government and small business environments. Our delivery model is built on a foundation of data sovereignty — ensuring PII/PHI integrity, controlled access, and audit-defensible recordkeeping at every layer of the systems we build and support.

CORE COMPETENCIES

- Enterprise-scale application development, reusable UI design systems, and data-driven system enhancement
- Systems integration and interoperability
- IT modernization and legacy transition
- Cloud environment and infrastructure support
- Smart infrastructure data mapping and secure systems connectivity
- Technical implementation and project coordination

SERVICE CAPABILITIES — TECHNOLOGY

- Application maintenance and support
- API integration and system connectivity
- Performance optimization and troubleshooting
- Legacy system transition assistance
- Ongoing operational technical support

SERVICE CAPABILITIES — RECORDS MANAGEMENT

- Compliance-based records retention scheduling (NARA, FAR 4.703, DFARS)
- Controlled document lifecycle management and disposition
- Secure destruction and certificate-of-destruction documentation
- Federal records classification and access control support
- Audit-ready recordkeeping aligned to agency retention requirements

DIFFERENTIATORS

- Structured delivery aligned to mission requirements
- Experience supporting enterprise scale systems
- Focus on system performance and operational continuity
- Direct leadership involvement and rapid response model
- Compliance-first approach to document handling and records governance

PAST PERFORMANCE

Commercial Systems Support

System support and technical improvements that enhanced performance and operational stability.

Private Sector Application Support

Application updates and integration support that improved system reliability and reduced workflow disruption.

Federal Records & Compliance Support

Records retention and document lifecycle support aligned to agency compliance requirements and disposition schedules.
